

# **Common Declaration of European and Mediterranean Trade Unions Against the Imperialist Intervention in Syria**

We strongly condemn the US, British and French imperialist assault, with the support of NATO and the European Union, against Syria.

We express our international solidarity with the Syrian people who are facing the sufferings of the 7-year war and have mourned thousands of people dead.

We denounce the fabricated evidence and pretexts used by the imperialists to launch wars and interventions such as the wars in Yugoslavia, Afghanistan, Iraq, Libya and Syria.

The situation is dangerous. Competitions of big business groups and capitalist states for gas and oil, energy lines and markets' control are escalating. These are the basis of imperialist wars.

## **We resist! We Rise Up!**

The peoples have nothing to divide between them. They are united by their common interests against the common enemy, the exploiters, their political representatives, the imperialist alliances, NATO and the EU.

The working class, their peoples and their children have a great power in their hands which can be released on the path of class struggle, the struggle for the right to jobs, wages and pensions, social rights, against the change of borders, against the imperialist wars and interventions.

With our struggles, we are demanding a peaceful life in a society without exploitation, poverty, refugees and wars.

**We honor International Workers' Day, May 1<sup>st</sup>, with strikes and big demonstrations**

**We Continue And Escalate Our Struggles!**

---
