

Dear Comrades

We also express our solidarity and condolences to the workers and families affected by the devastating fires in Athens. We are at your disposal to bring the concrete solidarity of the workers that we represent.

Our country, like yours, is increasingly affected by environmental disasters and fires resulting from uncontrolled capitalist development and many times the origin of fires is criminal. Against this condition we fight each time that we struggle for the health of the workers and the environment around them, against the interests of those who exploit it and devastates it to make profit. A struggle that is part of the objectives of the Class trade union movement and that makes us feel closer to the workers of the whole world.

We send you warm, militant greetings
